

**EXAMINING
“PROJECT FOR RURAL
DEVELOPMENT THROUGH
COLLECTIVE VEGETABLE SHIPMENT”**

15th-March, 2010
IVY Seminar on CVS

IVY Project Manager
Ayumi MATSUURA

Where did we start from..?

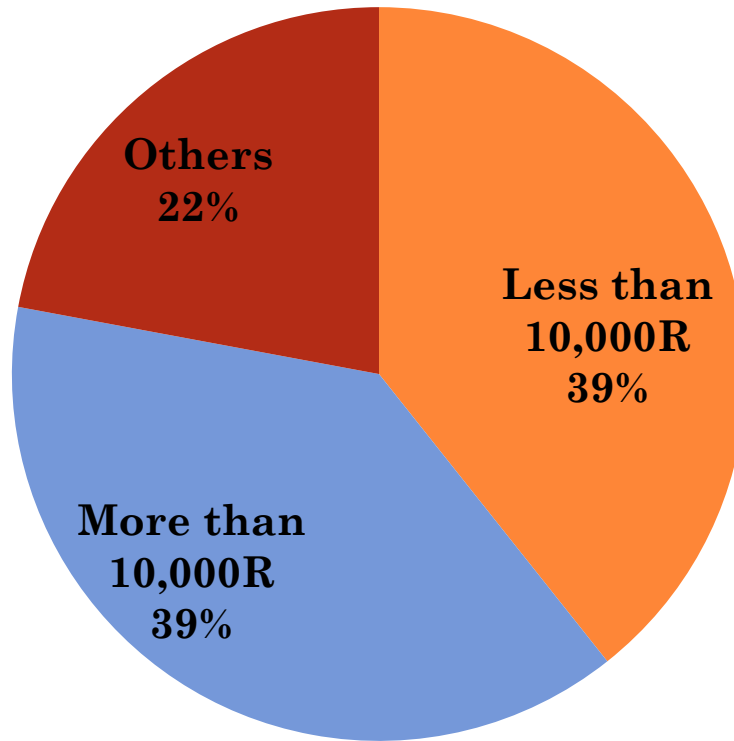

SITUATION OF THE TARGET AREA BEFORE THE PROJECT

From Baseline Survey of 4 experimental villages (2007)

- HH which has a family member who sells labor out of the villages: 70%
- Average money they send to their family: \$172 /HH/year
- Average expense of HH: \$396 /year
- HH which has income from agriculture activity: 7%
- Grow vegetable: 82%
- Purpose of vegetable growing: 26% for sale
- Size of home garden: average of 139m²

Income from vegetable sales for last month (2008)

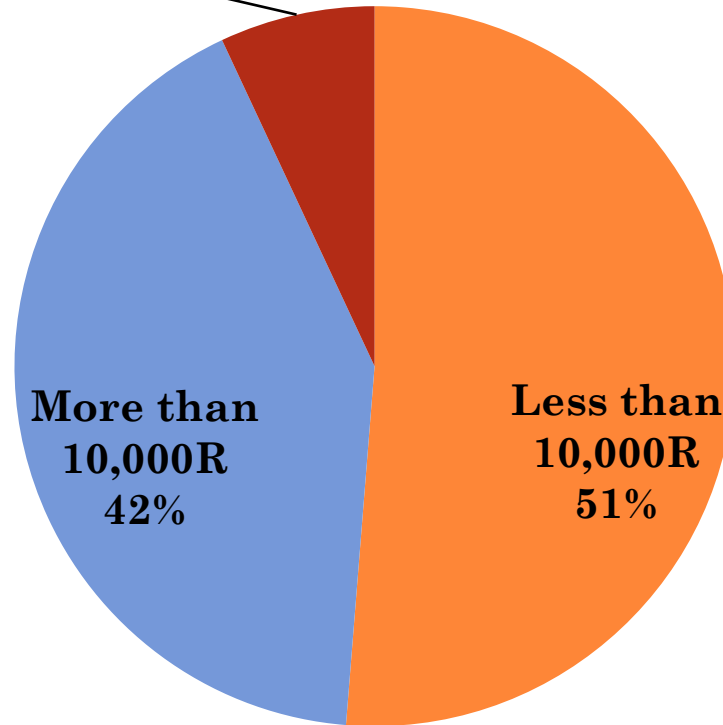

From Baseline Survey of 10 new villages (2008)

More or less \$2.5 of income for 1 month.

Saving /mo by growing vegetable (2008)

Others
7%

From Baseline Survey of 10 new villages (2008)

More or less \$2.5 of saving by home-consumption.

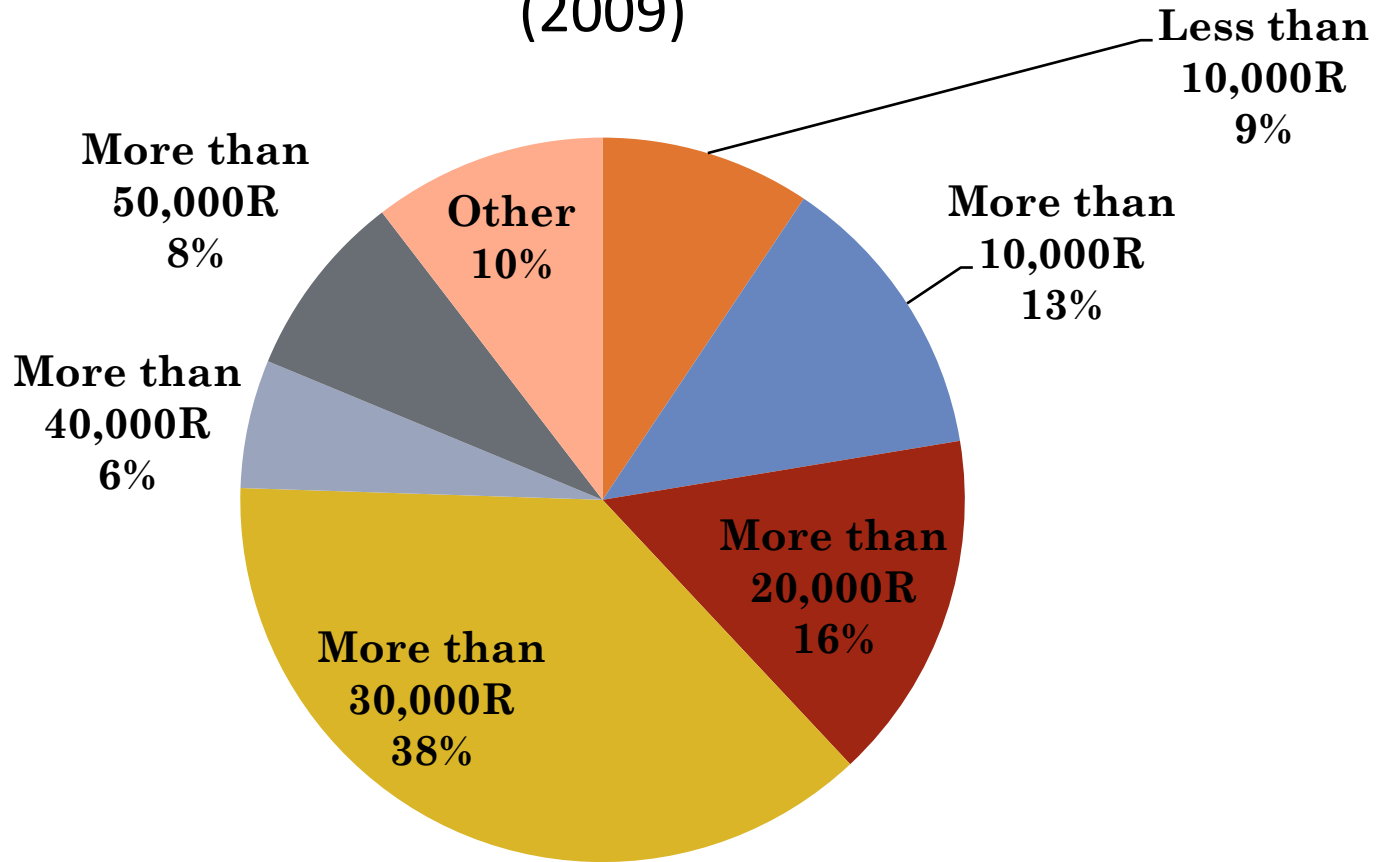

Question 1:

Did the project help to improve the livelihood of the beneficiaries?

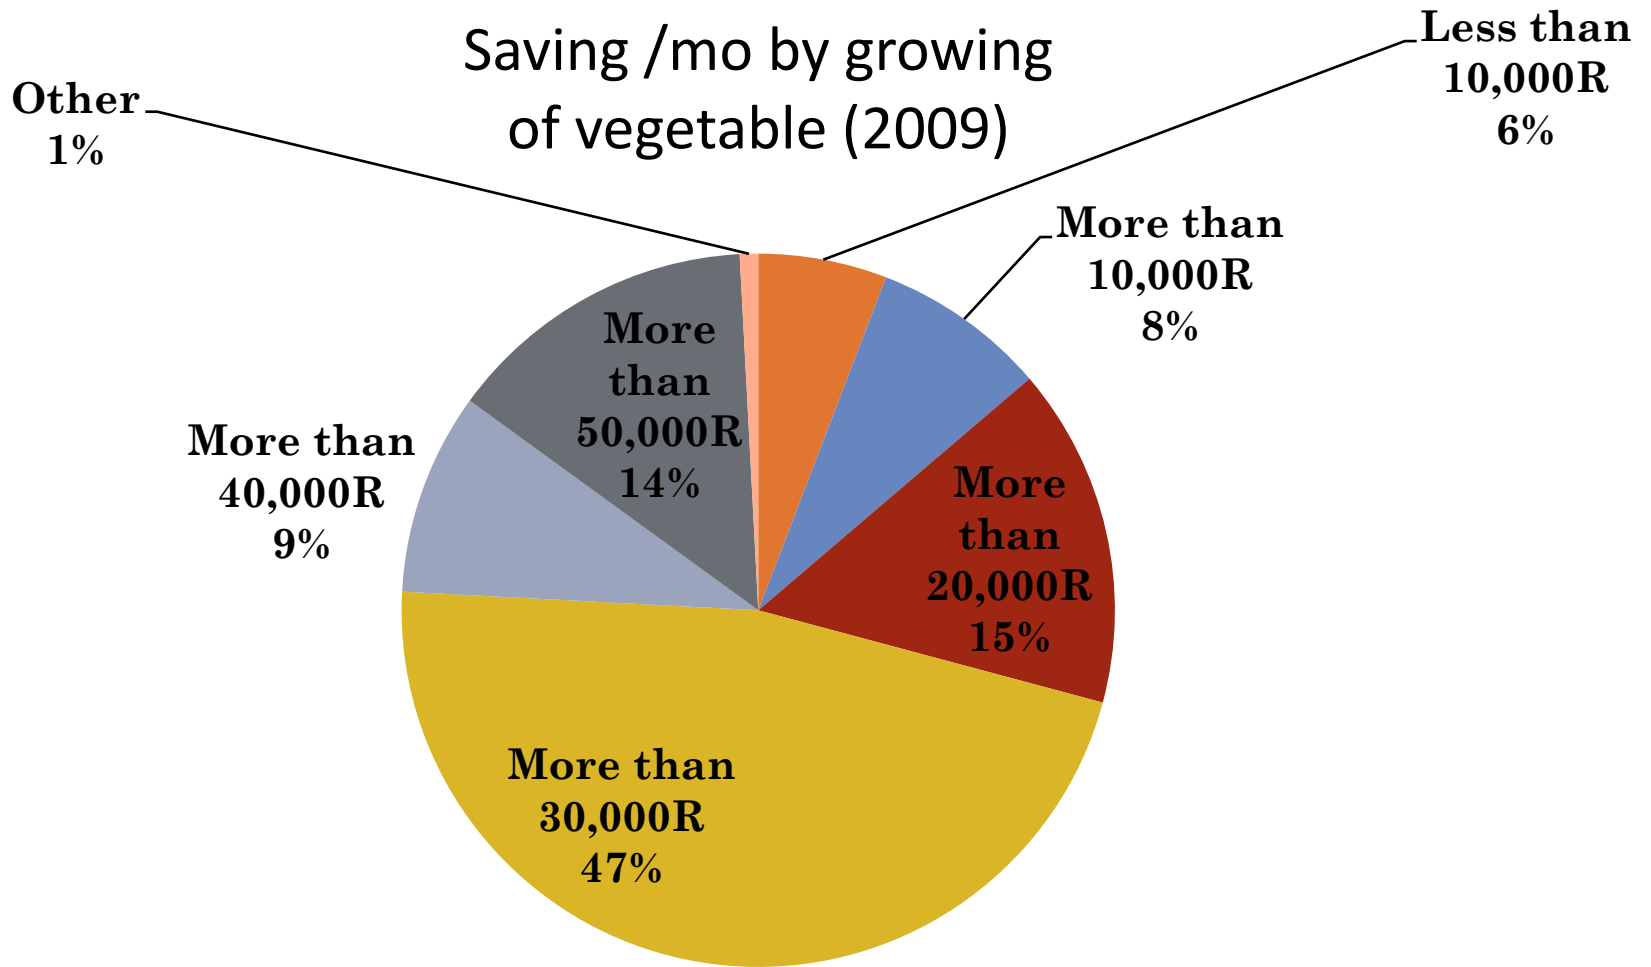

Income /mo from vegetable (2009)

From Evaluation Survey <4+10 villages> (2009)

Many answered \$7.5 of income per month.

From Evaluation Survey <4+10 villages> (2009)

Many answered they can cut down \$7.5 /mo by home-consumption.

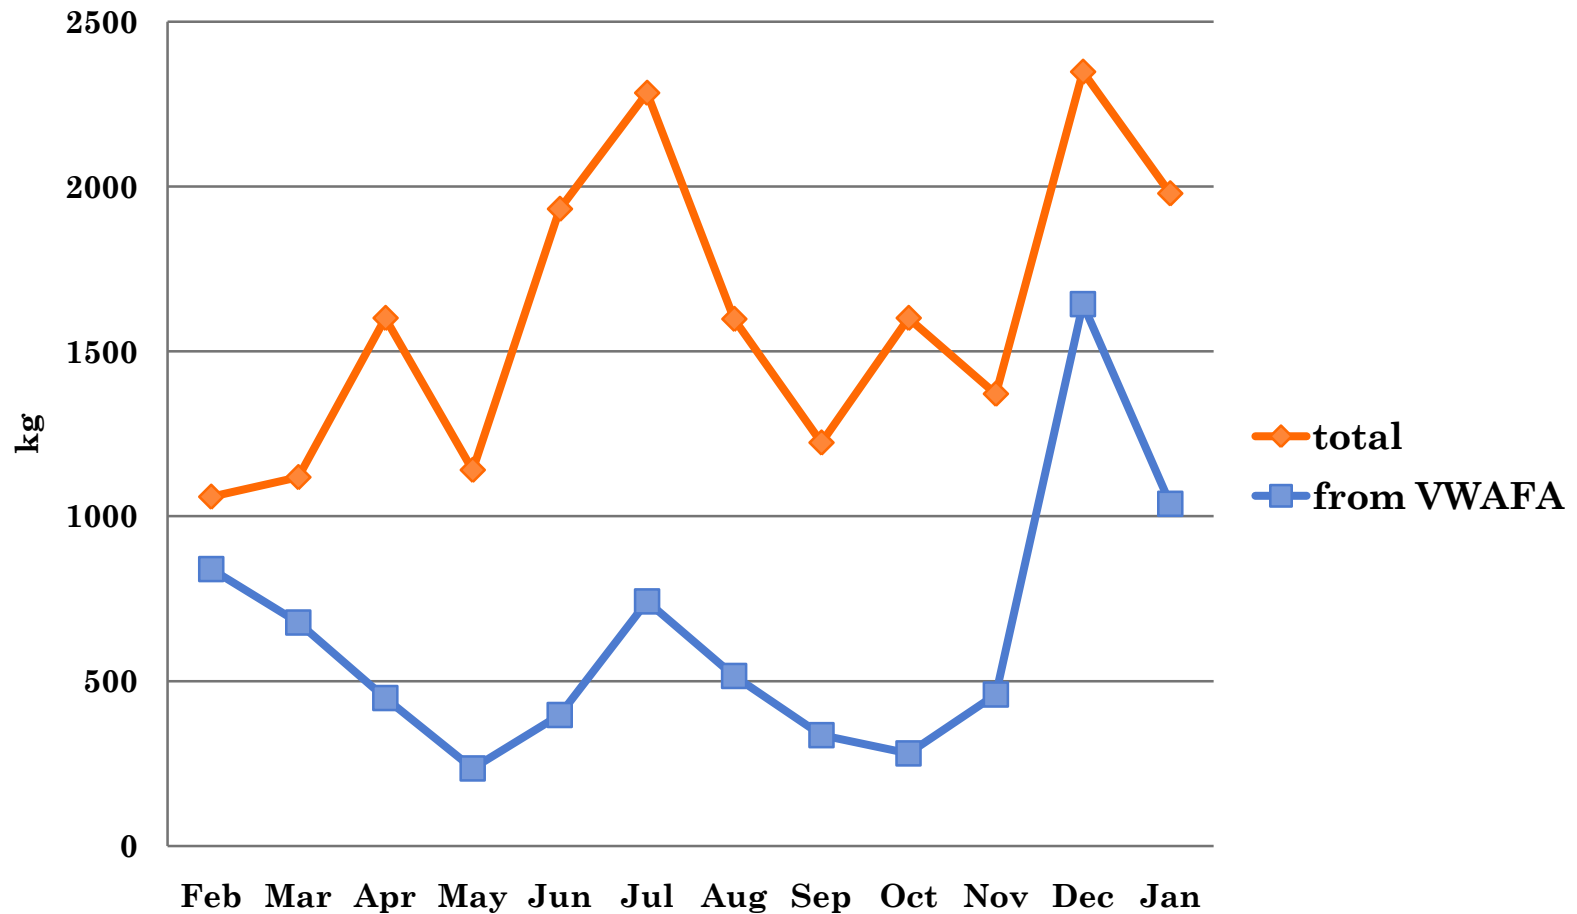

Question 2:

Were they ready for shipment to Bavet?

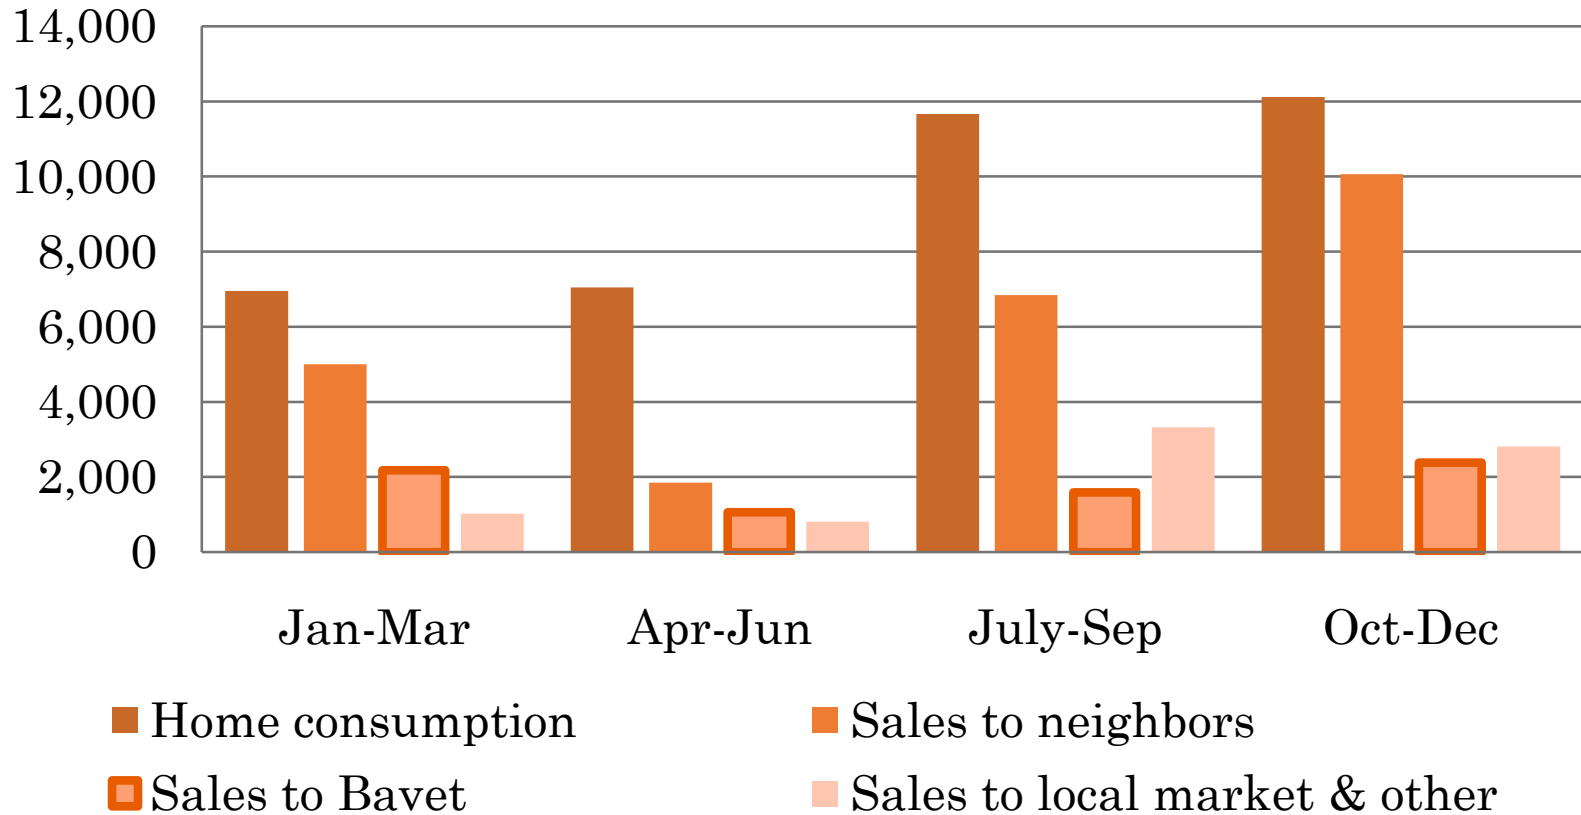

Shipment to Bavet

VWAFa continues to lack the amount to fulfill the order. (38% of the order in average)

Use of Vegetable (kg) (2009)

Sales to BAVET is not the popular choice.

- Still subsistence farming
- High demand of vegetable in the villages

Question 3:

Did technique of vegetable growing improve?

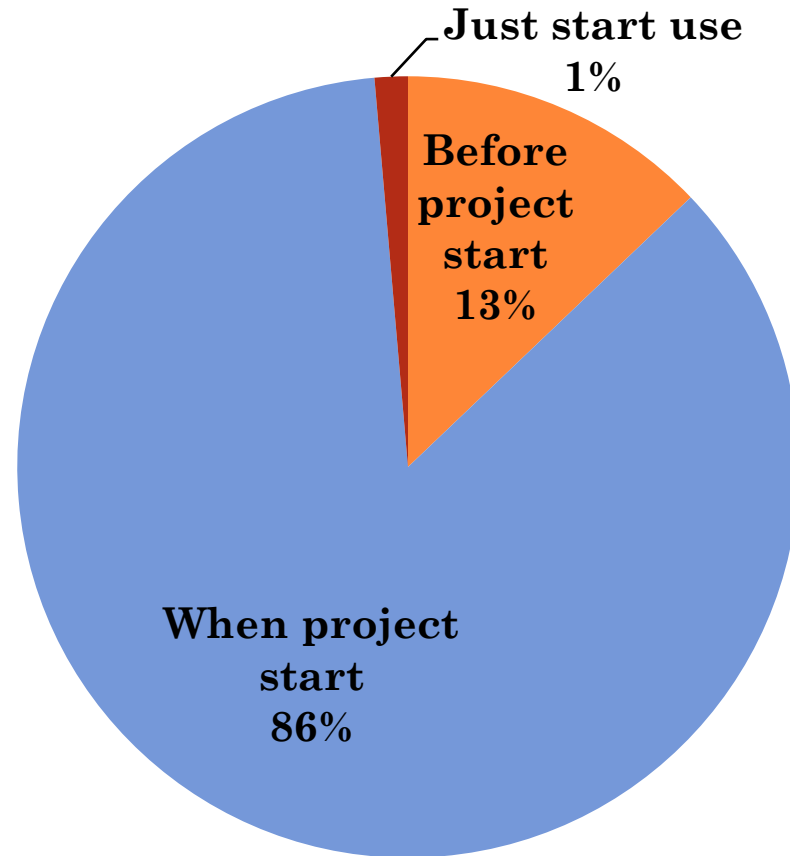

VEGETABLE VARIETY

- 26 out of 28 groups started to grow new kinds of vegetable.
- Total of new kinds of vegetable: 21 kinds (salad, Chinese radish, choy sum, eggplant, tomato, blok choy, etc.)

USE OF NATURAL FERTILIZER

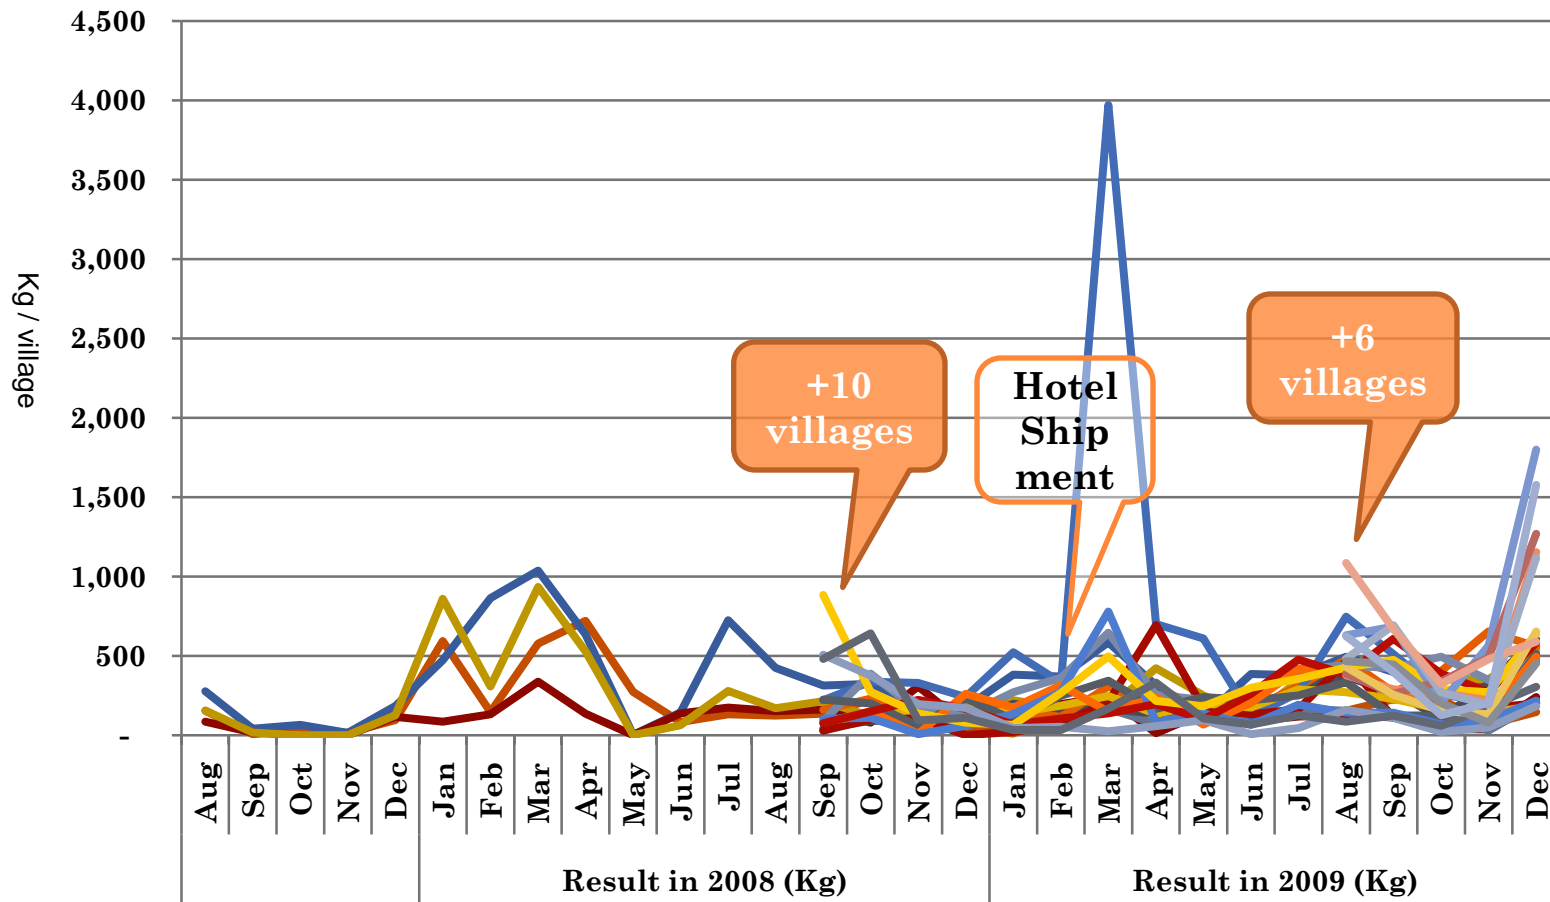

Many started to use natural fertilizer when the project started.

PRODUCTION AMOUNT

- However, production amount stays unstable.

WHERE WILL WE GO FROM HERE?

**CONTINUED TO INTRODUCTION OF
THE NEW PROJECT...**

Thank you.
